

DR. SHINO BAY AGUILERA

WHAT FASCINATES YOU MOST ABOUT THE HUMAN BODY

The skin and each person's distinct aging process. With our newest procedures, aging can be slowed, reversed and maintained. **I WOULD LIKE TO BE REMEMBERED AS** Someone who genuinely cared and gave back. **WHY DID YOU BECOME A DERMATOLOGIST** I have a true love for people and aesthetics. My passion is helping people optimize their beauty so they look and feel their best. **ANTI-AGING ADVICE** Replenish, rejuvenate and exercise. Take good care of your body; it's the vessel that holds your soul. Reverse the signs of aging early to delay and avoid more drastic procedures.

AFFIRM ANTI-AGING: 2 DISTINCT LASER TREATMENTS IN ONE, 15-MINUTE SESSION

Dr. Aguilera has incorporated two award winning dual-laser technologies—Affirm™ and Cynergy™—into his repertoire. Affirm—an advanced **DUAL-FRACTIONAL, MICRO-REJUVENATION, TISSUE-TIGHTENING** system that uses two lasers to heat the surface and deeper collagen layers concurrently—requires no downtime or needles, and can take 15 minutes to perform. With **OPTIMAL SAFETY, SPEED, COMFORT AND EFFICACY**,” he says. “This noninvasive procedure addresses skin laxity, sun damage, wrinkles, redness, pigmentation, scars and stretch marks, with **CONTINUING IMPROVEMENT** after treatment. It's a fantastic option for those who wish to quickly and effectively reverse the signs of aging. Similarly the Cynergy uses dual laser technologies to optimally address vascular conditions. In my opinion, these are truly **REMARKABLE BREAKTHROUGHS**.”

Just three, once-a-month Affirm treatments—in which unique MultiPlex™ technology fires two separate lasers in one pulse—enabled this patient to achieve micro-rejuvenation and skin tightening simultaneously. “Progressive and comprehensive, the no-downtime Affirm treats skin anywhere, with two distinct lasers in a single session, as evidenced in the above after photo, taken 30 days following final treatment.”

the future of beauty

Well credentialed, yet remarkably low key, Dr. Shino Bay Aguilera recently opened his spectacular, futuristic-looking new office on Las Olas Boulevard. It provides the perfect backdrop for the state-of-the-art procedures he performs every day. The Shino Bay Cosmetic Dermatology & Laser Institute, more specifically, is recognized by Cynosure as an official “Laser Center of Excellence.”

As a dermatologist, dermatologic surgeon and clinical laser specialist with a keen interest in aesthetics, Dr. Aguilera offers a unique combination of skill, patience and compassion along with a well-trained eye for beauty. At his booming, ground-floor dermatologic practice—Shino Bay Cosmetic Dermatology & Laser Institute—patients are always treated with premier technology and techniques. “I have a true zeal for helping people and enhancing their beauty and spirit,” says Dr. Aguilera, a fervent, enthusiastic physician who explains his drive as one that is motivated by “an innate, fundamental dedication to helping others realize their enhancement goals and improve their overall beauty, health and well-being.”

Dr. Aguilera—who is board certified by the American Osteopathic Board of Dermatology and a fellow of the American Osteopathic College of Dermatology—has over 10 years' worth of experience with aesthetic lasers and cosmetic injectables. The laser and aesthetic prodigy is also an international speaker who travels across the world, teaching other physicians how to properly use the newest laser advances and cosmetic techniques. Within his own practice, Dr. Aguilera offers a full range of what he calls “gold standard” laser therapies, Botox®, dermal fillers and a custom product line he developed for the aging face. Dr. Aguilera's proprietary, exclusive, medical-grade skin-care line includes the latest ingredients for soothing, firming, calming and anti-aging, designed to support his cosmetic dermatology and laser procedures and maintain gained results. Trained by the very scientists and experts who invented the laser technologies he uses, Dr. Aguilera is fluent in a host of laser and light sources. “Whether it's for wrinkles, sun damage, tissue tightening, redness, pigmentation, veins, stretch marks, scars or acne, I offer an amplitude of therapies that treat a variety of skin issues.” Similarly, his skillful technique and judgment with injectables give patients natural-looking symmetry—never overdone.
