

Get ready to *Turn Back* the Clock in just a few *short minutes!*

The newest advances in Laser Technology have revolutionized “Gold Standard” CO2 Laser Skin resurfacing and can now safely and precisely remove outer layers of damaged skin to reveal the underlying skin which is softer, smoother and often dramatically, younger looking. It also stimulates the regeneration of healthy skin underneath (called “LaserSkinRenewal”), for a youthful and beautiful appearance

This superlative skin resurfacing – rejuvenation procedure will reverse decades of sun damage, wrinkles, scars and many other skin imperfections in just minutes. When compared to other forms of laser treatment, the CO2 micro ablative is the new “Gold Standard” for rapid and optimal enhancement in as few as 1 treatment!

Dr. Shino Bay Aguilera, whose patients range in age from 13 to 81 says that “The micro ablation removes sun damaged skin and makes it fresher looking; the second

part called “bulk heating” improves collagen and elastic fibers deep down that improve deep to moderate wrinkles. It’s also great for removing and resurfacing skin, all types of scars, and safe anywhere on the face, body or hands. We are even using it on stretch marks.”

By fractioning the laser beam into thousands of microscopic beams a specific portion of the skin is left unharmed, which is more conducive to healing. This fractional method enables cells to begin healing immediately and creates it’s own dry bandage almost immediately. The completely comfortable, downtime can be adjusted to fit your busy schedule for 3 to 7 days – versus two months or more with the original Co2 laser. In 5-7 days your skin is gorgeous and the tightening and collagen regeneration continues improving for 3-6 months!

“The new “Non Surgical Laser Facelift or Eye Lift” can take years off a person’s appearance making them look many years younger,” noted Dr. Aguilera. Our other

popular cosmetic procedures include Botox, Dysport and Advanced Dermal fillers (like Sculptra) to replenish the volume of fat and bone loss on the face. Fillers take care of the volume and folds while the laser takes care of the skin’s wrinkles, texture and tone and laxity. Dr. Aguilera has trained thousands of physicians and is an advanced laser, cosmetic injectables and dermatological expert. He is a master artist of non surgical cosmetic enhancements utilizing the world’s finest technologies and techniques. His unique ability to provide patients with a dramatically younger but “natural look” makes him an in-demand cosmetic dermatologist - and as holder of two board certifications and a Fellowship in Dermatology from the American Osteopathic college of Dermatology, Dr. Aguilera is a internationally known, premier expert in beauty restoration, Cosmetic lasers and age-reversing techniques.

The world class, “Shino Bay Cosmetic Dermatology & Laser Institute” houses over 22 of the finest, leading edge, cosmetic technologies and is Certified as a prestigious, “Laser Center of Excellence” and Physician Training Center for the United States and Latin America.
